HACKTHEBOX

ROADMAP TO BECOMING A

RED TEAMER

HACKTHEBOX

1ST STOP

HTB Academy

Let's start from the basics:

Most red teaming tools run on Linux; understanding the basics is critical.

Scanning and mapping networks is often the first step in any engagement.

Metasploit is a versatile and beginner-friendly platform for learning exploitation.

A core skill for gaining higher-level access during engagements.

2nd STOP

Intro to Red Teaming Track

Master the fundamentals of cybersecurity with this track on HTB Labs, guiding you in building the essential skills step-by-step.

HACKTHEBOX

3rd STOP

HTB CPTS

Get one step closer to mastery! Learn how to detect security vulnerabilities that may not be immediately obvious. This path and certification will give you all the tools needed to learn ethical hacking and penetration testing in a practical manner.

FINAL STOP

Pro Labs

Take it to the next level - practice on simulated real corporate infrastructures with these advanced practical labs: Dante, Rastalabs, Cybernetics, APT Labs and more!

PRO LABS RASTALABS

PRO LABS APTLABS

PRO LABS DANTE

PRO LABS CYBERNETICS
